FERTILITY

Bulls are semen and soundness evaluated by Dr. Bryan Roe, DVM. Scrotal measurements are listed in the sale book.

FIRST BREEDING SEASON GUARANTEE

All bulls will be covered 50% by Vermilion Ranch if they are injured during their first breeding season. Breeding season is defined as the 60-day period following the first turnout of bulls.

50% of the value of the injured bull will be given as credit in a future Vermilion Ranch sale or toward a replacement bull, if one is available. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur, and prior to the injured bull being sold for salvage.
All claims must be made by September 1, 2027.

Welcome to Our 2026 Fall Performance Sale!

On behalf of our mom, Babe Goggins, and our entire family, we want to invite you to the sale and thank you for your interest in our program!

We really believe those of us that make a living selling grass, those of us that make a living with the factory, the cow and calf, those of us that make a living in protein production, are in the driver's seat and we are going to be there for quite some time. In my opinion this Nations cow herd will never grow back to 32-33 million cows, I hope and pray we can keep it at 28-29 million cows. We are seeing historic demand for our high-quality beef. Demand for prime beef is up 35% in 2026 compared to 2025. Demand for choice beef is steady with a year ago. Demand for select beef is down 30% in 2026 compared to 2025. The American consumer has proven they will pay for a high quality, consistent eating experience. Those of us that keep high-quality females around, that have some carcass merit, fertility and performance to them, will no question be in the driver's seat in the days to come!

We are so proud of this sale offering and feel they are no question a set of cattle that are right for the times! There is a lifetime of breeding behind these cattle that has focused on making cows look like cows and bulls look like bulls.

Friday we will be selling all our commercial bred heifers and 7 coming 8-year-old commercial cows off our Diamond Ring Ranch. These bred heifers are the front end of over 10,000 head that we started with. They truly are a special set of females!

Saturday at 11:00 am we will disperse all our 7 coming 8-year-old registered cows followed by 100 hand-picked registered heifers, and 80 April calving registered cows. Then we will sell as good a set of fall yearling and two-year-old bulls as we have ever sold. These bulls again have been PAP tested at 6,000 feet to help our customers that run at high elevation.

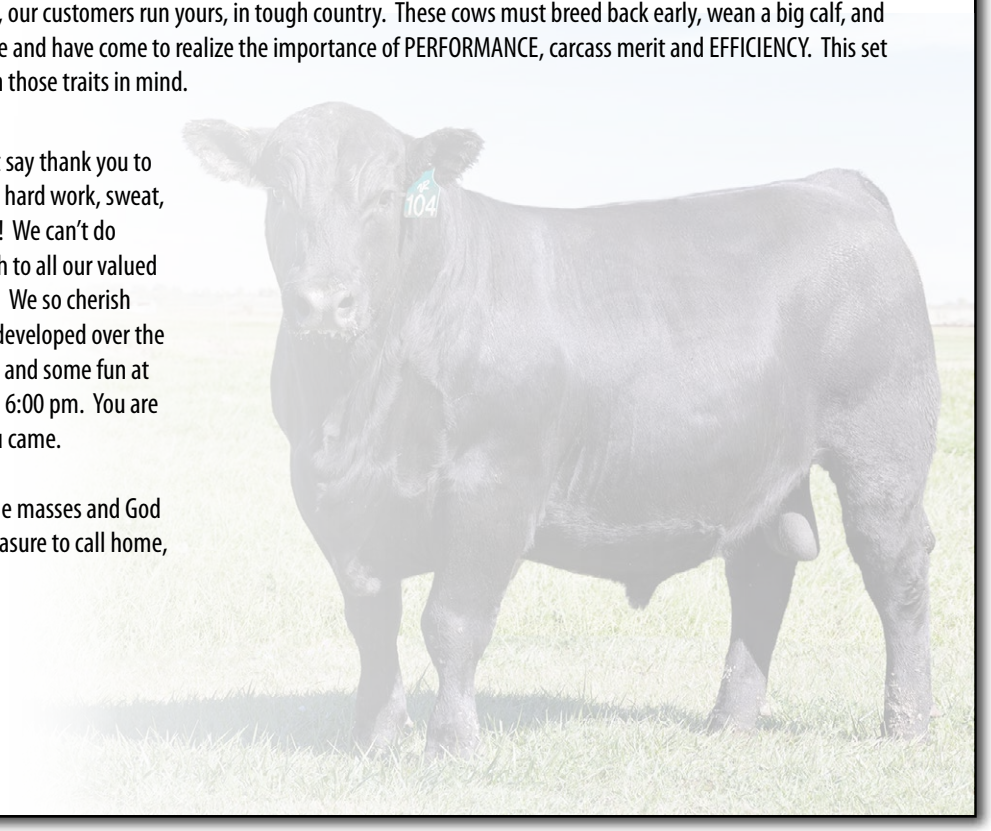

We run a lot of our cows the same way you, our customers run yours, in tough country. These cows must breed back early, wean a big calf, and be problem free. We also feed a lot of cattle and have come to realize the importance of PERFORMANCE, carcass merit and EFFICIENCY. This set of cattle has been bred and developed with those traits in mind.

In closing we would be remiss if we did not say thank you to our many dedicated employees for all their hard work, sweat, and tears it takes to keep this outfit ticking! We can't do what we do without them! Thanks so much to all our valued customers for your interest in our program. We so cherish the friendships and relationships we have developed over the years. Please join us Friday night for dinner and some fun at the Billings Hotel and Convention Center at 6:00 pm. You are all invited, and we would be honored if you came.

God bless the folks that produce food for the masses and God bless this great Country we all have the pleasure to call home, the USA!

Most Sincerely,

Joe Goggins

A Guide to Genomic Enhanced EPDs

All bulls have been AngusGS tested. To assist in your selection, below is an explanation of each EPD that is listed with each bull.

ANGUSGS Powered by Neogen GeneSeek

PRODUCTION EPDs

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

MATERNAL EPDs

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

MANAGEMENT EPDs

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet. Selection for this trait aims to improve the genetic potential for a sire's progeny to have lower PAP scores thus a lower chance of contracting high altitude disease increasing the environmental adaptability of cattle living in mountain areas.

CARCASS EPDs

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

$VALUE INDEXES

$Value indexes, an economic selection index allows multiple change in several different traits at once pertaining to a specific breeding objective. The $Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if the sires were randomly mated to cows and if calves were exposed to the same environment. More Info

Maternal Weaned Calf Value ($M) , an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value ($W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Beef Value ($B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value ($C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value ($M) and Beef Value ($B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

Bid through Northern Livestock Video Auction's Online Bidding Platform! Desktop and Mobile Friendly.

FROM YOUR DESKTOP:

1. It is best to use the Google Chrome web browser.
2. Pre-Register at least one day prior to the sale.
3. Go to bid.northernlivestockvideo.com and click "Get Approved to Bid".
4. Doing this will prompt you to create an account, after which you will fill out a bidder approval application.
5. Once approved an email will be sent to the email account provided. Please click the link in that email to activate your account and a buyer number will be provided.
6. On sale day (after approval), visit www.northernlivestockvideo.com to view and bid!

FROM YOUR MOBILE DEVICE:

1. Use your mobile device to download the Northern App and follow the above steps to get approved.

There is an instructional video on how to register to bid on our website, www.northernlivestockvideo.com if you have any questions.

For technical assistance with Internet Viewing and Bidding Questions, call Sam Fraser 406-860-0590.

PHONE BIDDING:
Anyone wanting to use the Northern Livestock phone bank to bid must pre-register and have a bid number to bid on the phone.
Northern Livestock Sale Day Bid Line: 888-375-6447.

To register with NLVA, call 866-616-5035 Before Sale Day.

View the Online SALE BOOK and VIDEO CLIP of each lot selling at www.northernlivestockvideo.com

Bidders who are successful in making purchases will be contacted following the sale to make payment and delivery arrangements.

PAP TESTED BULLS

In recent years, a number of our customers have asked if our bulls are PAP Tested, Pulmonary Arterial Pressure Measurement. Our elevation here in Billings is too low for meaningful testing results. Over the last six years, we have had the opportunity to run ALL of our fall born bulls at 6,000+ feet elevation during the summer months for 60 days. Once the bulls are at this higher elevation for this length of time, they become acclimated and a meaningful test can be taken. This year we were also able to PAP test most of the coming 2-year-old bulls under the same protocol. A few of the bulls stayed at the home ranch and are not PAP tested, and these bulls are so indicated in the sale book. All the testing was done by Dr. Britt Stubblefield, DVM.

Long Teton continues to work so well for us. His daughters are the cream of the crop after their first calves. He has sired some of our best bulls, topping at $85,000. The pick of the fall bred heifers from the Cattlemen's Congress at $29,000 was a Teton daughter.

PERFORMANCE April Calving Cows

Lots 421 through 517 sell in age groups and registration papers are available at an additional $250 per cow. All calves from these cows are eligible for registration. These cows will calve in April 2027. The pasture dates are the best judgement at ultrasound pregnancy testing time. These cows are bred to our best bulls we turn out. Sons of Sitz Commerce, Ellingson Three Rivers 0065, Deer Valley Growth Fund, Bomber sons and grandsons, to name a few.

Sired by Basin Keystone 2021, the high selling bull at the 2023 Basin sale, and a maternal brother to Basin Jameson.

PASTURE BRED HEIFERS

After AI season the heifers run in large pastures, followed up with the best young bulls we have. Mostly sons of Unified, Jameson and Riverside, and they are the lead off coming 2-year-old bulls in the sale. Lots 170 to 180. All calves sired by pasture bred multi sires are eligible for registration. Approximate breeding dates are based on ultrasound pregnancy results.

Commercial Bred Heifers

We have a tremendous set of commercial bred Angus heifers to offer. They come from Montana's best. They are all one iron heifers that are sorted to their origin and sold in uniform lots. Dr. Ralph Miller ultrasound pregnancy tested the entire offering. They will also be pregnancy checked by our veterinarian, Dr. Bryan Roe, just prior to the sale. All the heifers that are AI bred will sell with calves sexed to bull and heifer calves. All heifers will sell in short calving periods. Lots of work and effort has been put forth to put added value to these heifers. Once again, the quality never ends. Please note that calving dates are based on 275 gestation days. All the commercial heifers have had their first Guardian Scour shot, Vira Shield 6 VL5, and poured with Ivermectin.
